Punch is a low-cost workhorse with the convenience of optional magnetic card or fob activation.

With the affordable Punch employee timeclock, you will capture accurate, centralized employee time data and ensure quick and orderly punch in/out.

- ✅ **Ensure proper pay for time worked by job classification**

- ✅ **Eliminate clock errors and reduce abuses: make everyone's job easier**

- ✅ **Do away with paper timecards and tedious manual data entry**

- ✅ **Correlate clock-in/out to projects and job classification for analysis and resource allocation**

- ✅ **Stop losing productivity during shift changes with speedy contactless shift clocking**

- ✅ **Sync with cloud-based time and attendance system including mobile clocks for centralized time and labor management**

Punch™

Convenient Timekeeping

Instead of chasing down timecards and correcting errors, you can import employee time into a cloud-based time and attendance system.

Safe and hygienic: in proximity mode, your employees don't have to touch the keypad. This makes Punch more sanitary than timeclocks that require physical contact.

An affordable timeclock solution for office settings, call centers, healthcare, retail, hospitality, educational, manufacturing, and industrial.
